

# QUICK AC CHARGING POST

PT3-63

---

THE QUICKEST AC  
CHARGER OF THE  
MARKET ABLE TO  
**CHARGE A CAR IN  
<30 MIN\***

READY FOR VEHICLE  
FLEETS & CAR DEALERS

INTELLIGENT & RELIABLE

BUILT IN DATA LOGGING  
& WEB REMOTE  
MONITORING

---

*\* Applicable to cars with 3-phase  
charging system & 22 kWh battery  
(i.e. Renault Zoe)*

---

## QUICK CHARGING POST PT3-63

The Smart Post series provide a durable and modular enclosure with the necessary robustness to support hard climatic conditions and a high protection index IK. Equipped with the latest technology in terms of communication and safety, it allows to charge electrical vehicles in an easy and protected way, so that the driver has the best charging experience.

### Main SPECIFICATIONS

#### Hardware

|  |
|--|
| 3-Phase 400 Vac 63A                                |
| Output rated power 43kW                            |
| Backlight LCD information display                  |
| RFID card reader for access control & prepayment   |
| Smart metering                                     |
| TCP / IP Ethernet Port                             |
| 3G modem (optional)                                |
| 5m tethered cable with a type 2 connector (mode 3) |
| ZE / EV Ready certified & available                |

#### Software

|   |
|---|
| OCPP v.1.2 / 1.5 & XML protocol integration   |
| Embedded SCADA (without backoffice)           |
| Report of charging logs                       |
| Alarm notification by email                   |
| Enable/Disable charger at different timetable |

### EV-REPORTS SOFTWARE

Software that allows to make a query of all charge transactions stored in one or more charging points and presents them on a single screen.

#### MAIN FEATURES

|                            |
|----------------------------|
| Selectable time interval   |
| Filtering options          |
| Export to spreadsheet file |
| Multilanguage interface    |
| User friendly              |

### MODELS

| Ref           | Supply | Power | Charging Voltage | Charging Current | Connector type | Charging Mode | Ethernet | 3G |
